	Watch chapters 6 & 7		
	Sunday Nov 12	5:00 pm	Zoom Q & A session, chapters 6 & 7
	Watch chapter 8		
	Tuesday Nov 14	7:00 pm	Zoom Q & A session, chapter 8
	Watch chapter 9		
	Thursday Nov 16	7:00 pm	Zoom Q & A session, chapter 9
	Sunday Nov 19	2:30 pm	In-person review session followed by exam

Where: Online class. The in person exam will be at Beckwith and Kuffel,
1313 S 96th St, Seattle, WA 98108

Recommended text: **ARRL Ham Radio License Manual**, level 2
(General Class), 9th ed. Be sure to get the 10th edition, with the
July 1, 2023 to June 30, 2027 question pool.
This is available from online sellers or directly from the ARRL. It may also be in
your library. A Kindle version is available.

Fee: There is no fee for the class. However, there is a \$15 fee to take the license exam (which goes to the ARRL). The FCC charges a \$35 for the license (renewable every 10 years).

Class size: Minimum of 8 and maximum of 20

Age requirement: None. Children under 16 should be accompanied by an adult in class. Children under 12 will likely need extra help.

Note that a Technician level ham radio class (level 1) will be offered as well. Students may elect to take both classes. The Technician class precedes the General class, and is given on Oct 20 – Nov 4. A student must pass the Technician class exam before proceeding with the General exam. Registration is separate for these two classes. If you want to take both, please register for both classes.

This is intended to be a fun, low-key, learning experience. Class participation and asking questions is encouraged. However, we will not call on individual students during class so that you can feel free to participate at your comfort level.

Students are not required to take the exam at this end of this class. There are many exam sessions offered by our club or elsewhere in the area if you feel the need for more study.

Explanation of the exam:

The General exam consists of 35 written multiple choice questions drawn from a question pool of approximately 425 questions. The question pool, which is updated every 4 years, is publically available and is included, with answers, in your book. Each question on the exam is randomly drawn from each of 35 topic areas. The passing score is 26 (74%). Morse code is not required. If you do not pass, you can, time permitting, take the exam again (with a different set of randomly generated questions) for another \$15 fee. If you pass and would like to try the next higher level exam (General or Amateur Extra), you may do that in the same test session, time permitting. Plan on the exam taking 1 ½ hours (including instructions, taking the exam, grading by the examiners and then getting your result).

Suggestions for study:

A number of good online practice exams and study guides are available to practice at home. We recommend <https://hamstudy.org/> . This site offers online “study flash cards,” “read the questions” and “practice tests.” Explanations are available by clicking in the upper right corner of the flash card. While practicing flash cards, the site uses progress tracking and will concentrate on review of sections that you are finding difficult. Another site offering practice exams is: <https://www.qrz.com/hamtest/>. There are also smartphone apps for ham radio study and we recommend HamStudy.org’s version.

Most people find it easiest to study one chapter at a time, until the questions become familiar, before moving to the next chapter (rather than going through all the questions in the book at once). The online study guide hamstudy.org, mentioned above, provides an excellent way to study. Then try some practice tests. Once you consistently score at least 26 out of 35 correct, you are ready for the test.

If you have any questions, please contact me at AA7XX@westseattlearc.org.

David Hillier, W7AW Training Officer

The following will be needed on the exam day:

Exam Fees

The fee of \$15.00 is charged to take the license test and can be paid by cash (preferred, and exact change please) or check (made out to “ARRL VEC”). If you do not pass the test and wish to retake the test, there is an additional fee of \$15.00 for each retake. Opportunity to retake the test will depend on the time left during the testing session and the availability of the volunteer examiners.

Valid ID is required at the time of the Exam

The following identification will be required at the test session prior to taking the exam. Please bring one of the following:

1. A legal photo ID (driver's license, passport)
2. If no photo ID is available, two forms of identification:
 - a. non-photo ID/driver's license (some states still have them)
 - b. birth certificate (must have the appropriate seal)
 - c. social security card *
 - d. library card
 - e. utility bill, bank statement or other business correspondence that specifically names the person; or a postmarked envelope addressed to the person at his or her current mailing address as it appears on the Form 605.
3. Students/minors may bring any of the above items and/or a school ID, minor's work permit, report card, or a legal guardian may present a photo ID.

**FCC Registration Number (FRN)* is required by the FCC to be used on your license application forms. Please note that the ARRL will not accept an electronic submission of the test materials with social security numbers. So please obtain your FRN prior to the exam. It is very easy to do, just go to <https://www.fcc.gov/rofrn/> for complete instructions, including a "How to" video.

Materials needed for the exam

Bring at least two working black ink pens and at least two #2 Pencils (pre-sharpened as a sharpener will most likely not be available). We will supply you with a blank paper that you can use as scratch paper. A calculator is not required, however you may find it useful. A simple calculator without a memory is preferable. If bringing a programmable calculator, memories, formulas and programming must be erased and this will be verified prior to taking the exam. Calculator apps on cell phones, tablets or computers are not allowed during the test session. During the test session, you will be asked to turn off your electronics, with the exception of a calculator. This helps maintain an environment conducive for testing for everyone.

General or Amateur Extra class exam takers:

If applicable, bring either a photocopy of your current Amateur Radio license or a reference copy printed out from the FCC website, the license information printed from ARRL website or QRZ website, or the original(s) and photocopy(s) of any Certificates of Successful Completion of Examination (CSCE) you may hold from previous exam sessions. If your license has already been issued by FCC, the CSCE showing license credit is not needed. The photocopy(s) will not be returned
